

Lostine Public Safety Project

CONTACT LOG

Name(s): Fred Brockman (land owner), Ron Polk (land owner and president (?) of High Lostine Homeowners Ass), Kris Stein

Date: 2/27/17

Summary of comments: in person at Wallowa Mountains Office

Discussed concerns about information they had heard at a meeting they attended hosted by HCPC/ORW. Heard a lot about not enough collaboration, but didn't want to discuss that.

Expressed that if the Forest Service did not address ORW's concerns about collaboration, which should take 4-6 more months that they would be very disappointed. Kris said the Forest Service was taking a pause to engage more with the public for now.

Spent 1 hour reviewing project documents, asking questions and getting clarification about the project. They recommended some ways to write the documents so less technical, and identified some errors in the document. Kris was able to answer most of their questions. Fred and Ron said that they appreciated the time spent and felt they understood the project better. Liked some of the proposed actions, particularly the hazardous fuels removal. Still had concerns about some activities.

Agreed to stay in touch
